
Give your Business a Simple & Cost-effective Enterprise-Level Phone System

Callture Cloud-based VOIP Phone Systems offer small businesses a cost-effective way of projecting a big company image.

The Problem of Ineffective Phone Systems

Regardless of its size, every member of today's highly competitive business world has to meet the challenges of effective communication. Whether it is with clients, partners, and government organizations or internal among business departments etc., the communication system has to be fast, reliable and scalable. If it's not, the business' performance pays the price. Even a small business needs a highly efficient phone system, just like its large competitor does. The need for an efficient phone system is coupled with the need for an affordable phone system and therein lies the problem.

The Solution

Before the recent advances in technology, only companies with gigantic budgets could afford sophisticated phone systems. However, modern technology has made it affordable for small businesses to adopt the communication options that were once available only to large enterprises.

Leading the revolution in telecommunication is the cloud-based, or hosted, phone system. It perfectly matches the way modern business function. Cloud-based phone systems are affordable, reliable and provide enterprise-level functionality. It can efficiently serve businesses that are spread over several locations and facilitate remote operations for mobile workers.

By combining virtual PBX and voice over Internet Protocol (VoIP) technology cloud-based phone systems enable uncomplicated, cost-effective and feature-rich business functionality to all businesses, removing the need for costly and less efficient on-premise phone systems.

In addition to freeing companies from the shackles of expensive on-premise phones systems, cloud-based business phone systems also provides matchless features, performance and reliability. They offer local, national and international calls as well as a wide range of call management options which facilitate business growth.

Making the Most of the Solution

Callture Cloud-based Phone Systems help businesses make the most of the cutting-edge cloud-based phone technologies. Callture helps businesses optimize state-of-the-art technology to fuel their

operational efficiently, growth and achieve their specific business goals.

From projecting a big business image to enabling seamless call conferences, Callture Cloud-based Phone Systems helps your business do what it does best, even better. Communication is key, regardless of your business industry or size.

Today's highly competitive business environment does not give businesses the leeway to run an outdated and expensive phone system. The competition is vying for your target market and even your employees.

Callture's Cloud-based Phone Systems provides all the functionality that an on-premise system does, and adds reliability, simplicity, speed, affordability, mobility and scalability. It also removes the logistic demands of maintaining the expensive hardware and the need for upfront investment and in-house management expertise.

Immediately after signing up for Callture's Cloud-based Phone System, your company gets a toll-free or local phone number. If you already have an existing toll-free number, you can easily transfer it to Callture.

Unlike onsite phone systems, Callture Cloud-based Phone Systems don't require any activation fee, hardware/software charges or complicated setup procedure.

Benefits of Callture Cloud-based Phone Systems

No Setup Fee

Unlike with onsite phone systems, you can get started with Callture Cloud-based Phone Systems without paying any setup costs.

Low Monthly Costs

Callture's smart use of the cutting edge technology translates into the most competitive rates in the market.

No Technical Expertise Required

Your business does not need to have in-house experts to install or run Callture Cloud-based Phone Systems, which adds to the cost-effectiveness of our system. Just sign up and get started.

Feature-Rich System

From customized main greeting, memo-on-call, conference calling and live call transfer to unlimited call handling, dial-by-name directory and call blocking, Callture provides a feature-rich, enterprise level phone system.

Big-Company Image

The extensive array of features and the quality delivered by Callture helps project a big-company image for your business.

Superior Call Quality

Callture makes sure that the most basic function of phone system i.e. providing crystal clear audio communication, doesn't get lost in the long list of features its Cloud-based Phone Systems provide.

Excellent Customer and Support Service

Callture's fine customer and support service compliments the amazing Cloud-based Phone Systems the company offers. From sign-up to after sales support and correspondence, every thing Callture offers is geared towards making your business easier and more profitable for you.

The Conclusion

The simple and obvious conclusion is that you need to leverage the power of Cloud-based Phone Systems as part of an enterprising aptitude.

An increasing number of entrepreneurs and small businesses are realizing that they need the help of a reliable and dedicated company. Just banking on a big brand name often exposes them to impersonal and inflexible mass-produced solutions that don't justify their costs and even cause problems.

To make the best decision, ask the provider questions like:

- Do you offer all PBX features?
- Are the features available at additional cost or included in the package?
- Do you offer a system that cares for my business' specific needs?
- Can you provide customer references?

Wherever your business stands with regard to its goals, size and industry, the Callture Cloud-based Phone System is a lifeline for your customers and hence for you as well.
